

CYC The Island
Frisbee Golf – Risk Management Plan

School:	Year Level:
Supervising teachers / staff:	Dates:
Program / Excursion:	Location:

For an explanation of risk management terminology and to ensure you understand how the rating / grading system is determined please ensure you have read the **CYC Activity Risk Profile** document.

The Frisbee Golf Risk Management Plan contains the Frisbee Golf specific risks, control measures and gradings, as well as the gradings of all general risks relevant for all CYC activities. Please refer to the **General Activity Hazards – Risk Management Plan** for a list of general risks and control measures relevant for all CYC activities.

Risk Description	Existing Control Measures	Rating		
		Likelihood	Consequence	Control Effectiveness
Slip – Trip – Fall Caused by; 1. Wet conditions	<ul style="list-style-type: none"> Care should be taken when the grass is wet and slippery, especially if using a run-up when throwing the frisbee 	Unlikely	Minor	Satisfactory
2. If using another activity	<ul style="list-style-type: none"> Participants are instructed not to go on any other activities whilst completing the Frisbee Golf Course 	Unlikely	Minor	Satisfactory
Cutting / Scratching Caused by searching for Frisbees in trees or bushes	<ul style="list-style-type: none"> Be observant of wayward throws, watch closely for where the frisbee enters heavily trees areas to minimize the amount of searching 	Possible	Minor	Satisfactory
Striking 1. Being hit by frisbee	<ul style="list-style-type: none"> Follow frisbee golf rules, ie. wait until group in front and the flight path are clear, participants waiting to throw are standing behind current thrower If completing practice throws on oval prior to commencing course, participants should be well spaced out and throwing to be controlled by leader 	Unlikely	Minor	Satisfactory
2. Students being hit by road users, or participants and equipment from other activities	<ul style="list-style-type: none"> Course has been designed so there is minimal contact with road users on the site (there is only one road crossing) Participants are instructed to be alert and aware when on or near any roads within the campsite Road signs are clearly displayed throughout the campsite highlighting the speed limit and that the roads are a shared zone (vehicles and pedestrians) The group is instructed to walk around, rather than through activities if searching for their frisbee Participants always complete the activity in groups and are instructed to look out for each other 	Rare	Moderate	Satisfactory

Risk Rating – Frisbee Golf

All identified risks are recorded in the Risk Matrix according to the Likelihood and Consequence. The purpose of this matrix is to provide a snapshot of all identified risks and establish the level of risk associated to determine if further treatment is required.

X		Likelihood					
		Almost Certain	Likely	Possible	Unlikely	Rare	
Consequence	Catastrophic	80	64	48	32	16	<ul style="list-style-type: none"> Environmental Exposure 4 Environmental Hazard 3
	Major	40	32	24	16	8	<ul style="list-style-type: none"> Environmental Hazard 1 Inappropriate use after hours People – Instructor 1 & 2 People – Group Leader 2
	Moderate	20	16	12	8	4	<ul style="list-style-type: none"> People – participant behaviour Environmental Exposure 2 Striking 2 Environmental Exposure 3
	Minor	10	8	6	4	2	<ul style="list-style-type: none"> Cutting / Scratching Slip-Trip-Fall Environmental Exposure 1 Environmental Hazard 2 People – participant ability Slip-Trip-Fall 1 & 2 Striking 1 Entanglement Cutting / Scratching Striking People – Group Leader 1
	Insignificant	5	4	3	2	1	

NB: All risks in **bold** are Frisbee Golf specific risks. All other risks are from the General Activity Hazards RMP and are therefore relevant for all activities.

For grading risks, scores obtained from the risk matrix are assigned grades as follows;

HIGH 20 – 80	MEDIUM 10 – 16	LOW 1 – 8
Unacceptable risk which requires immediate action to reduce or remove the hazard. Senior management must be notified. Item should be TAKEN OFF LINE until risk reduced.	Conditionally acceptable, requires short term controls and continuous monitoring.	Acceptable risk, however monitoring required ensuring risk does not escalate. Review in 12 months or if situation changes.
